KnightMarket - Initial UI Implementation

Group Project Checkpoint #4

Submission overview

This document contains 21 emulator screen captures from the group's initial UI implementation, presented in screen order. Each capture is labeled with its screen name and corresponding Android XML layout.

Design notes and changes

Light and dark presentation

The screens demonstrate both light and dark modes we will provide. Also a few new screens we decided to include.

XML-only visual assets

Listing photographs use XML placeholders. The map is an illustrative campus vector placeholder rather than a live map.

New listing, screens 13-14

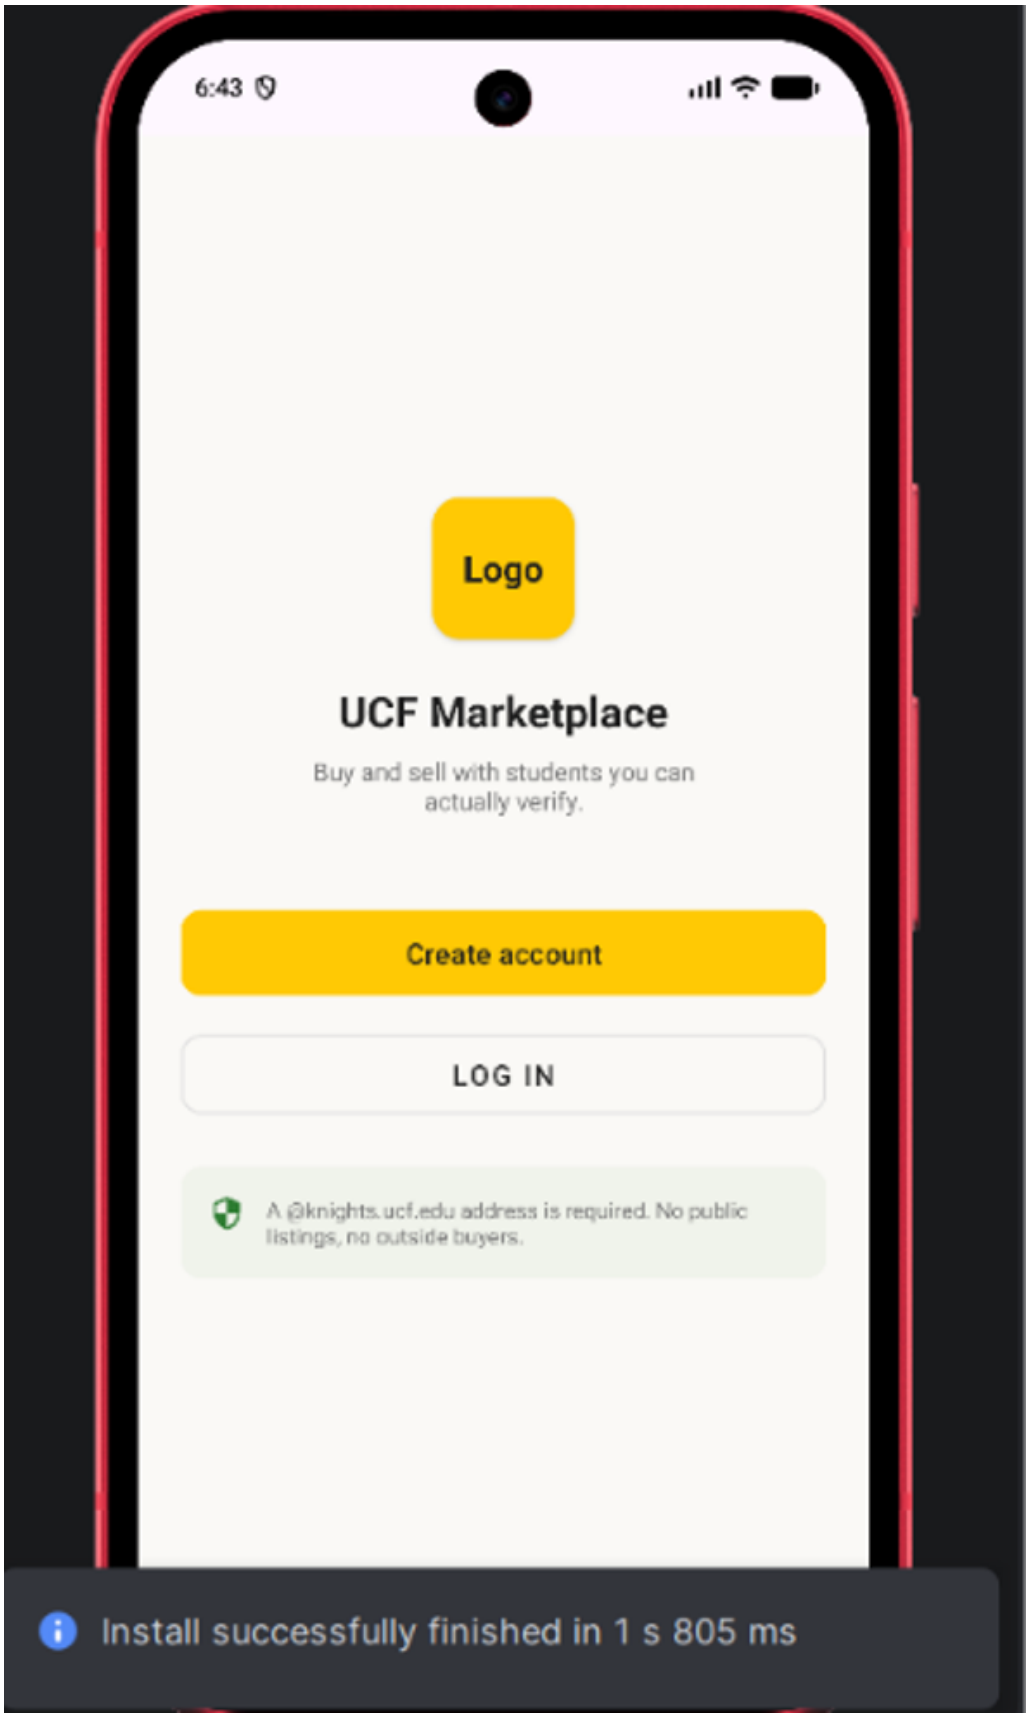

Both reference screens are implemented as one scrolling form. The supplied capture shows its initial state, consistent with the checkpoint's initial-state requirement.

Account verification

Email verification is included as screen 02B, alongside the create-account screen labeled 02A.

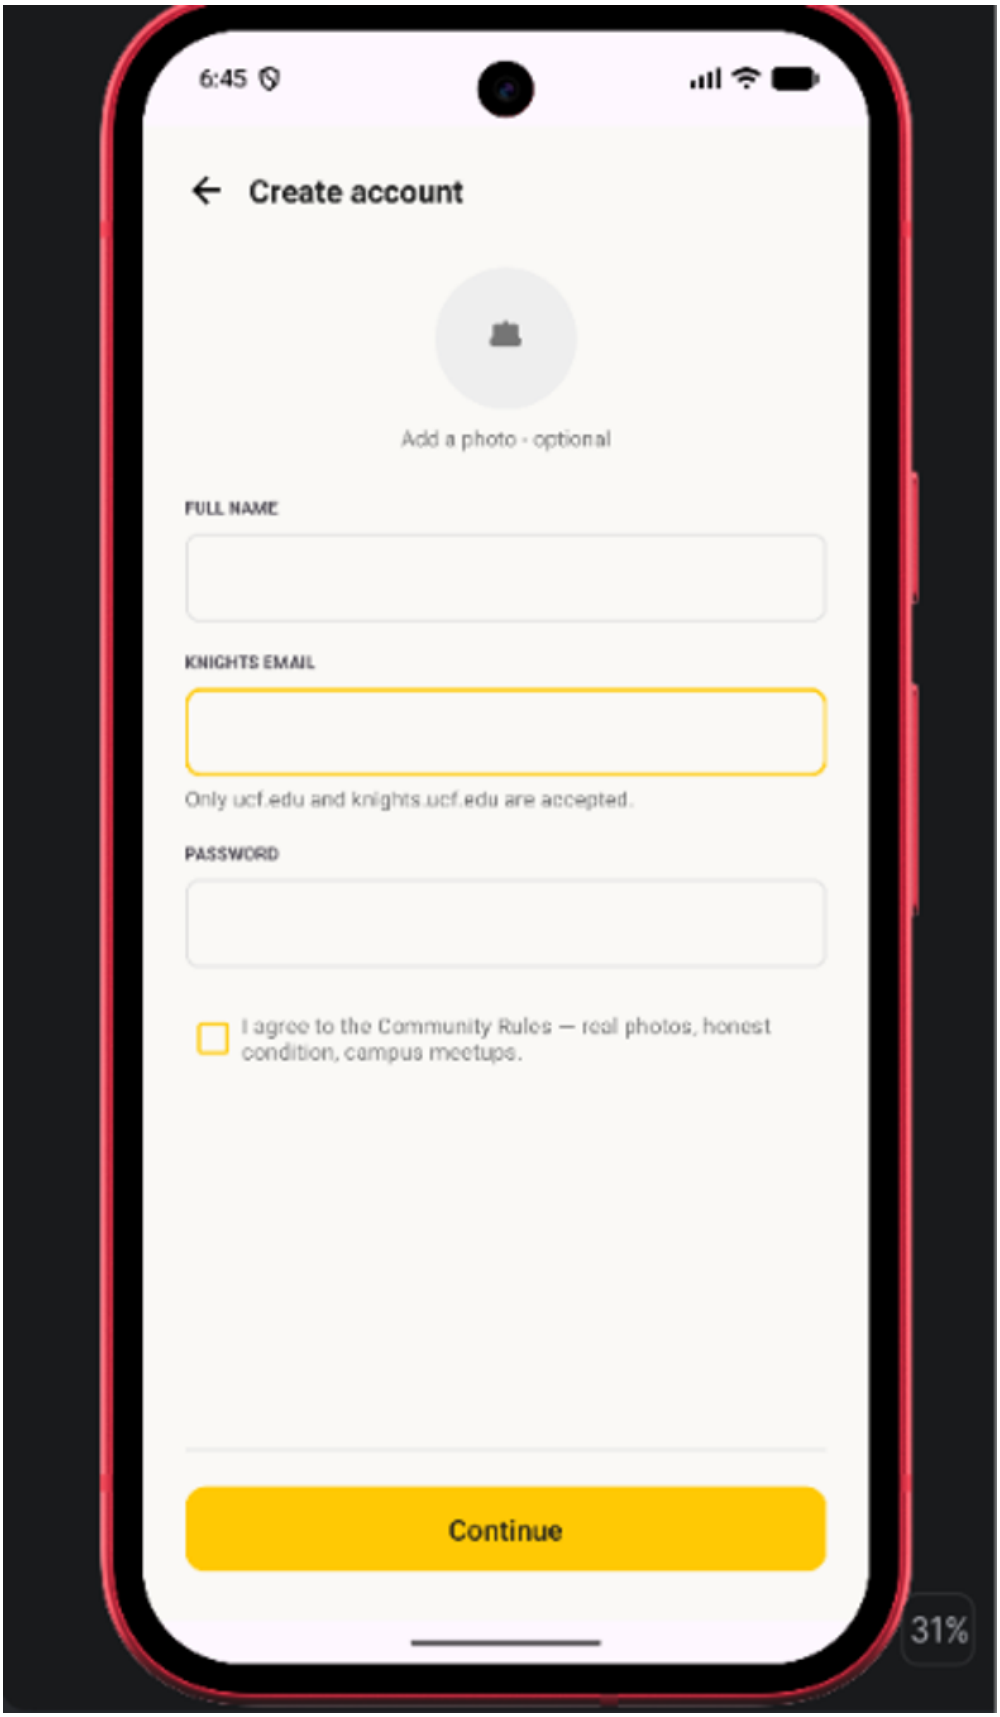

Screen 01: Welcome / Sign in

activity_landing.xml

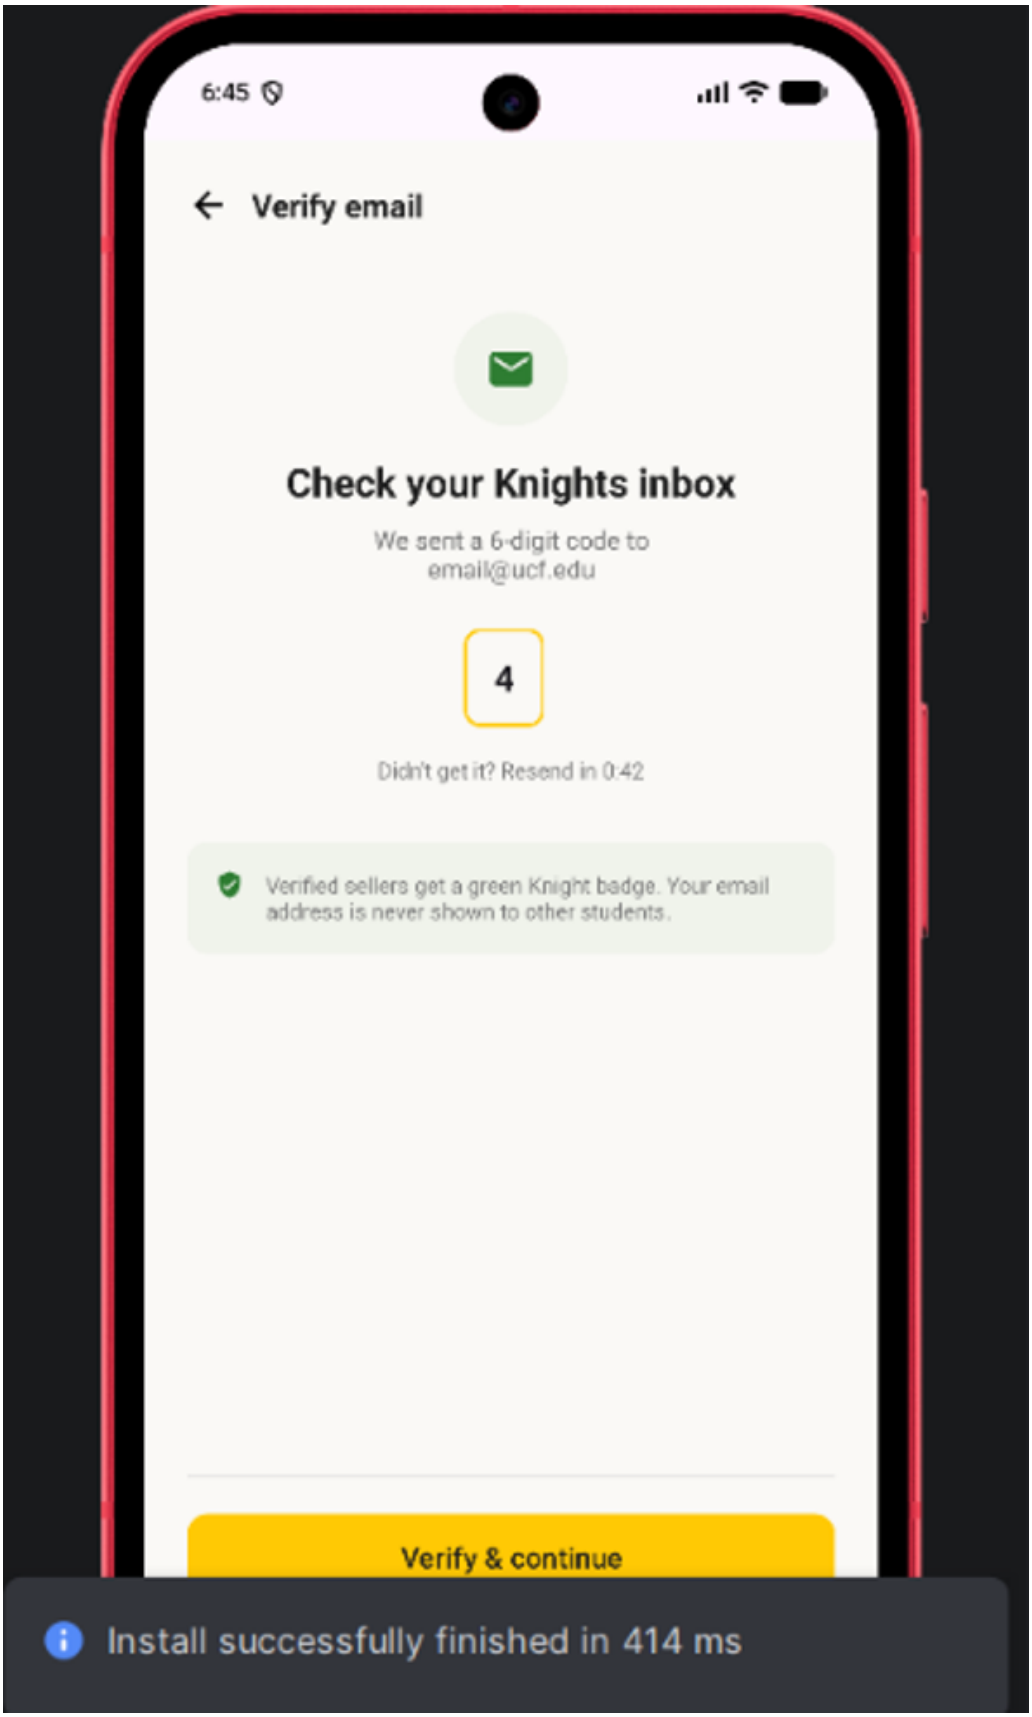

Screen 02A: Create account

activity_create_account.xml

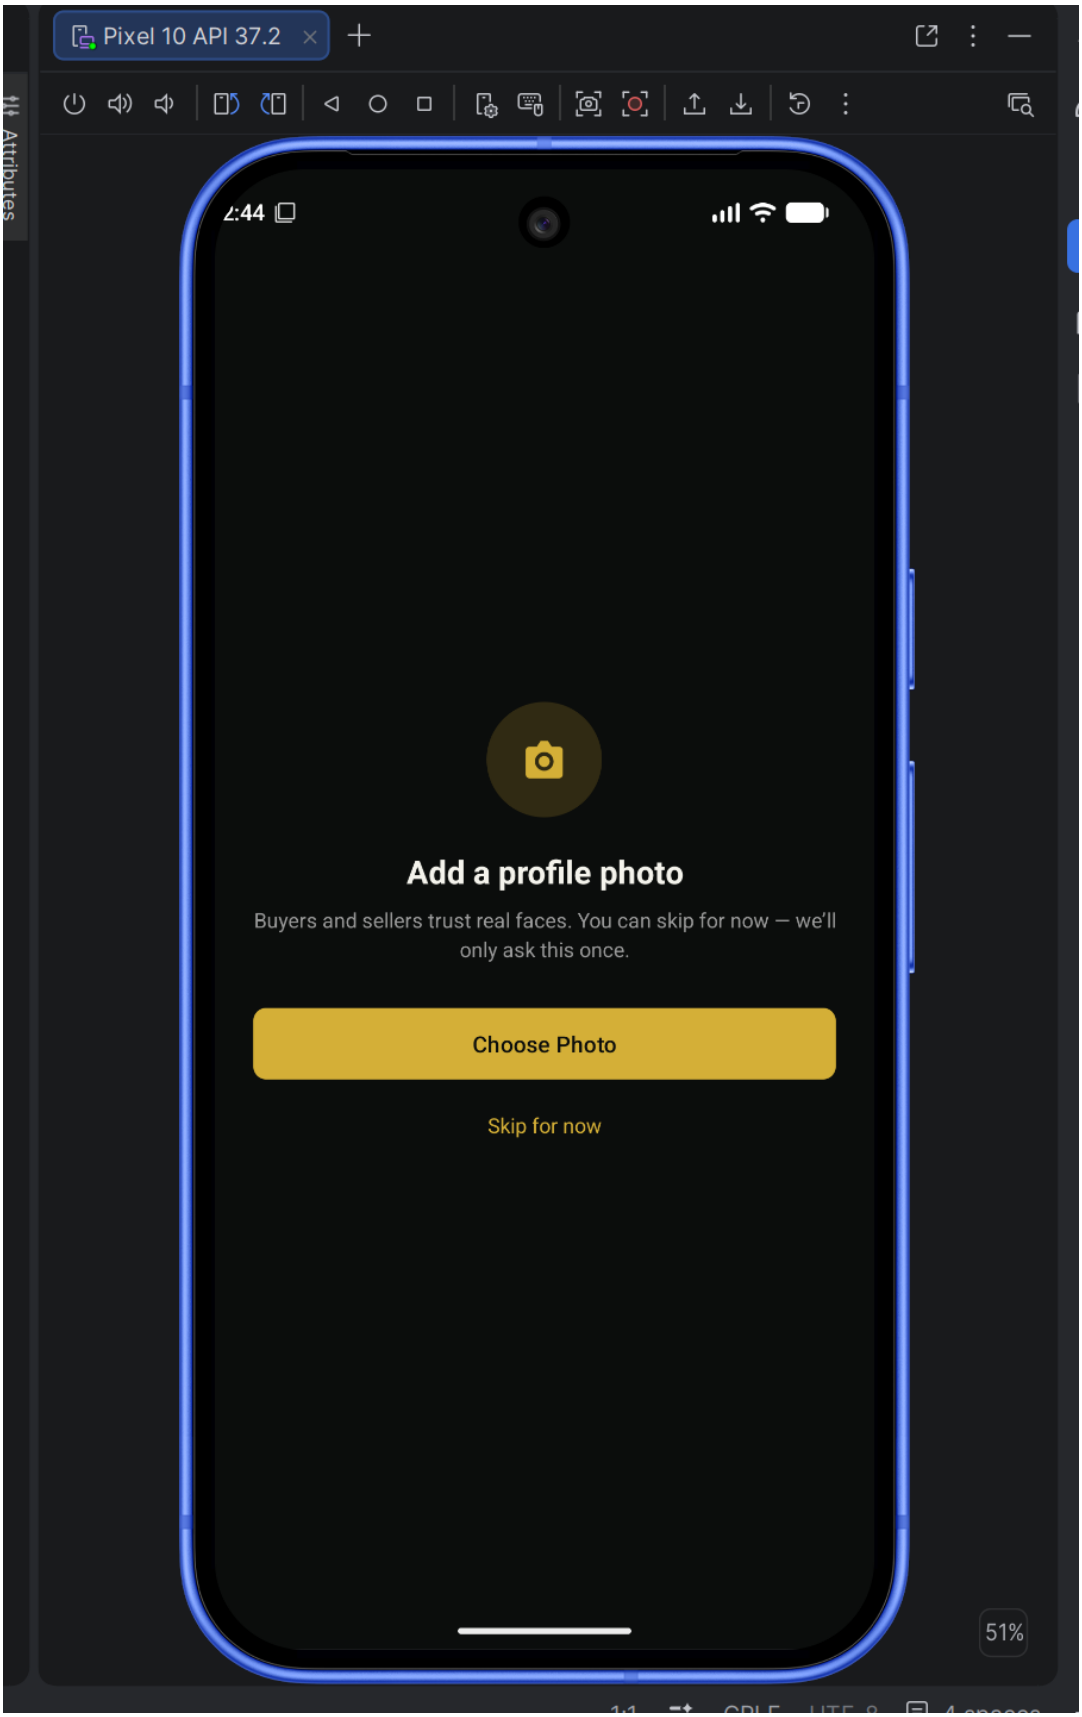

Screen 02B: Verify email

activity_verify_email.xml

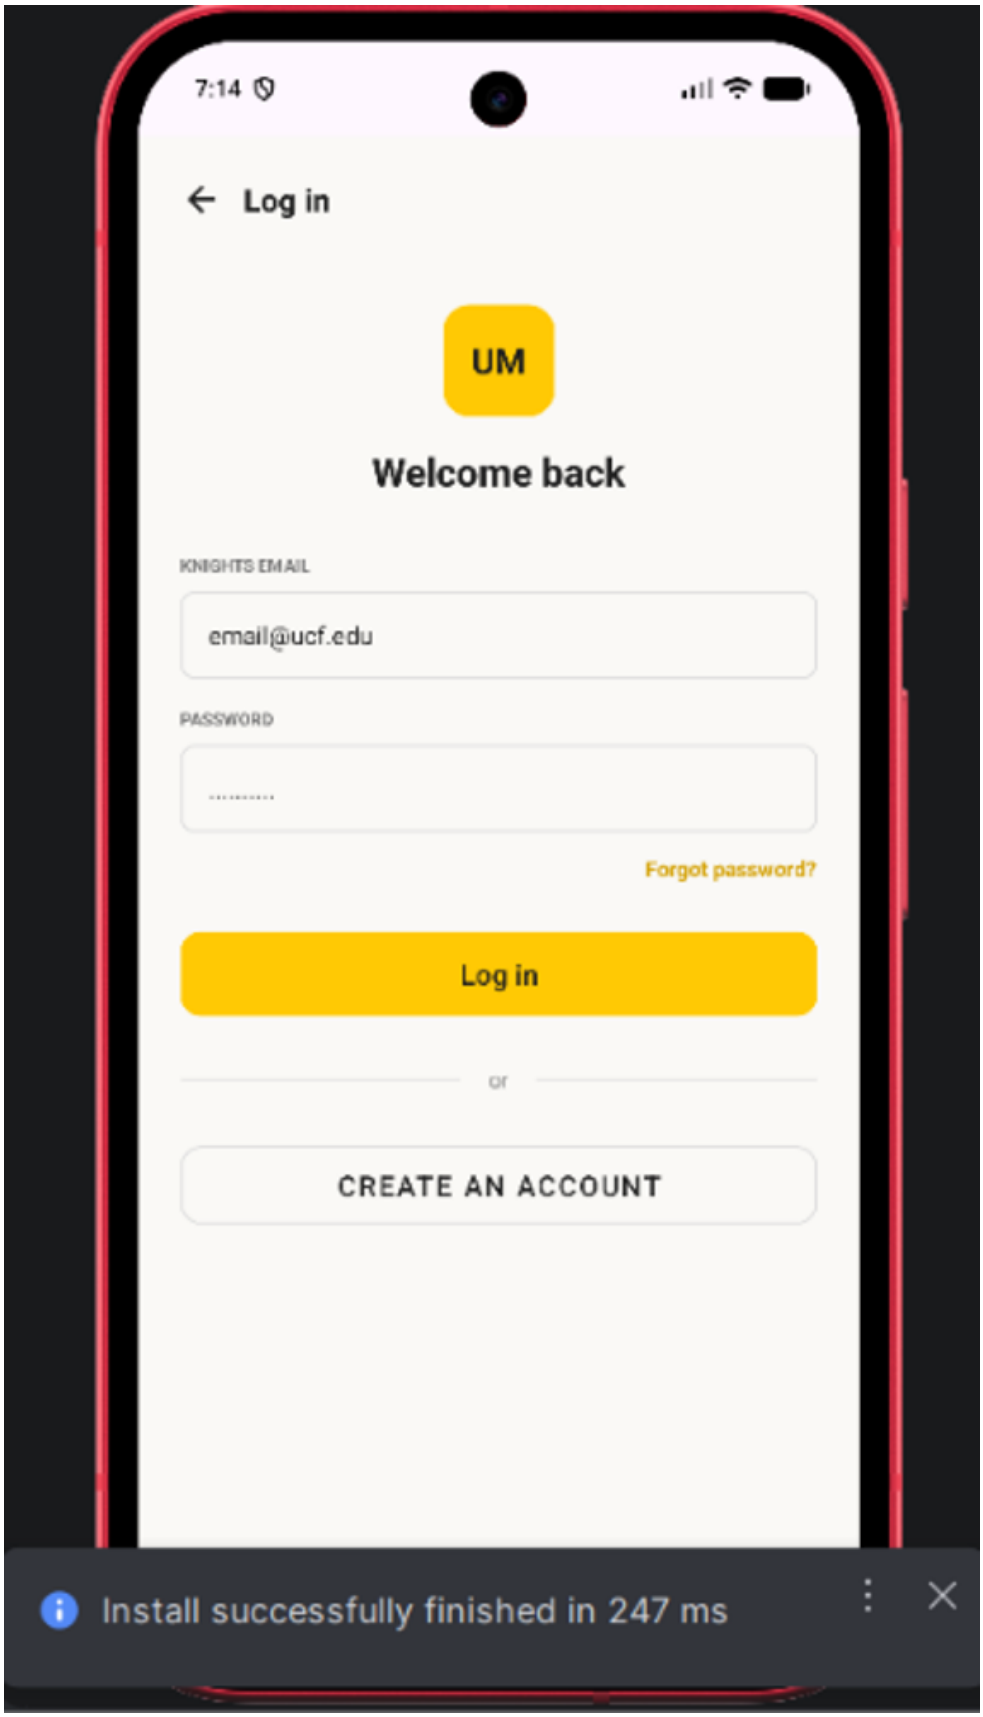

Screen 03: Profile photo

activity_profile_photo.xml

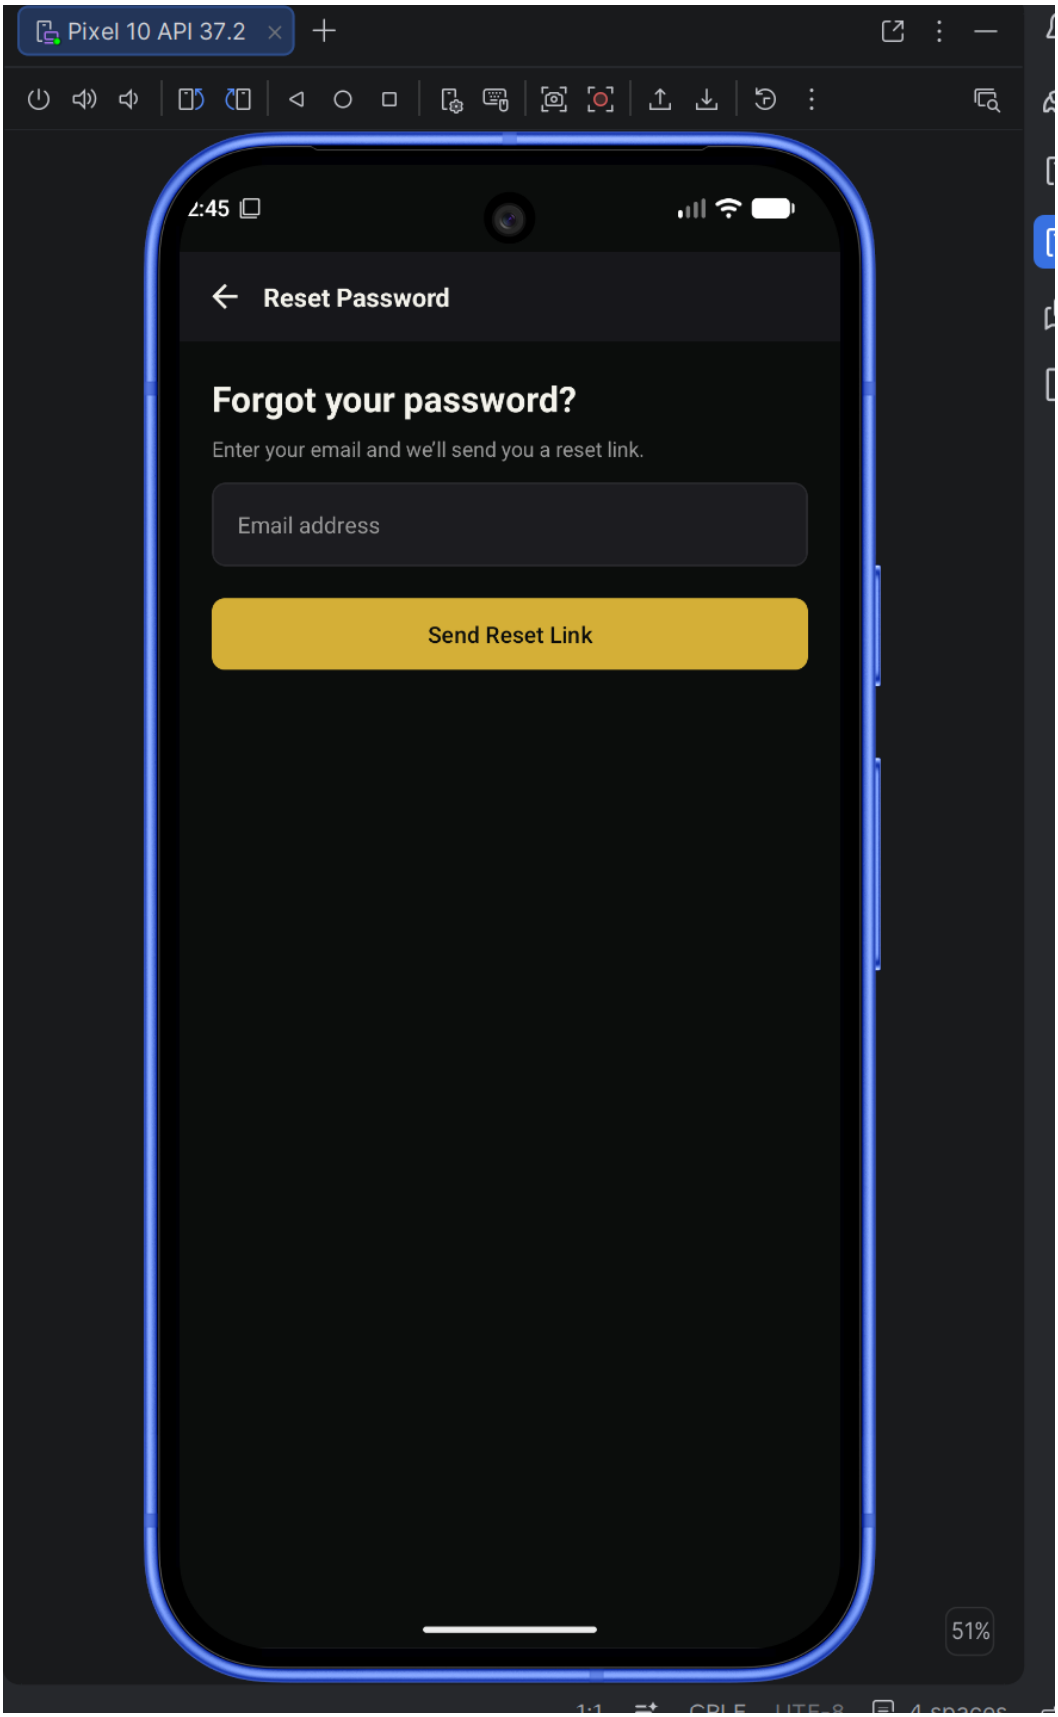

Screen 04: Log in

activity_login.xml

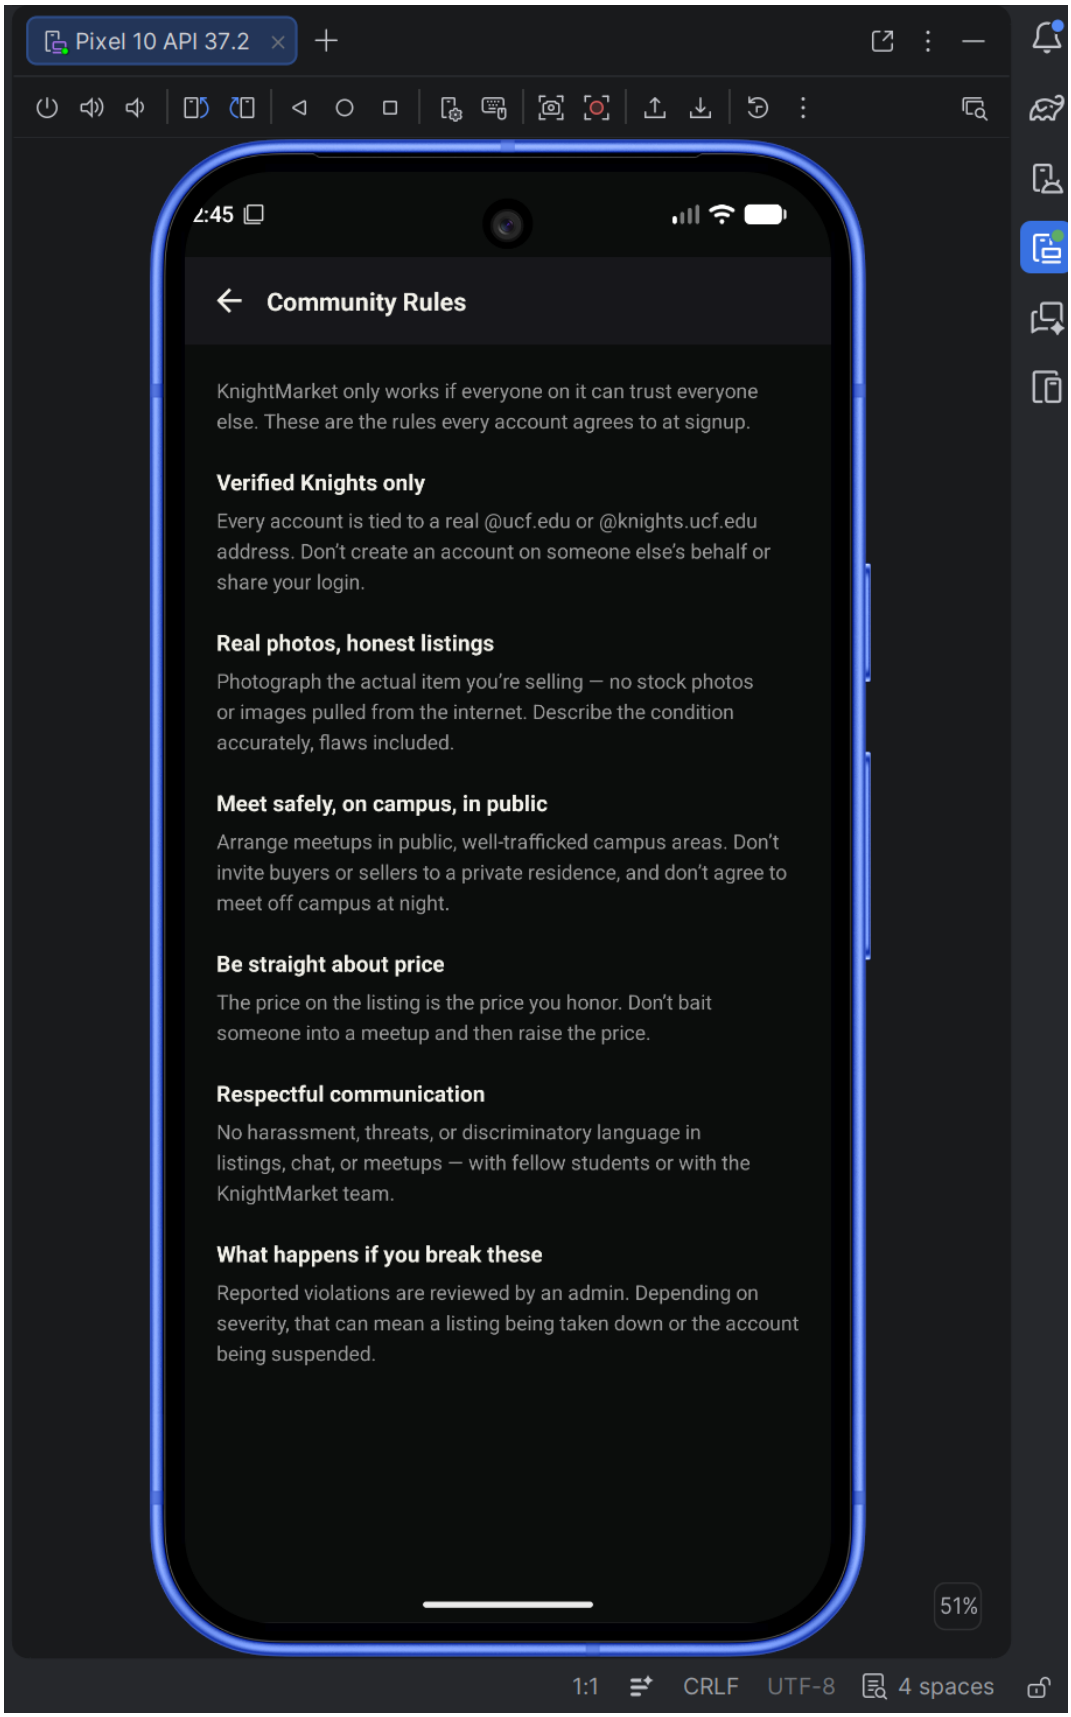

Screen 05: Reset password

activity_forgot_password.xml

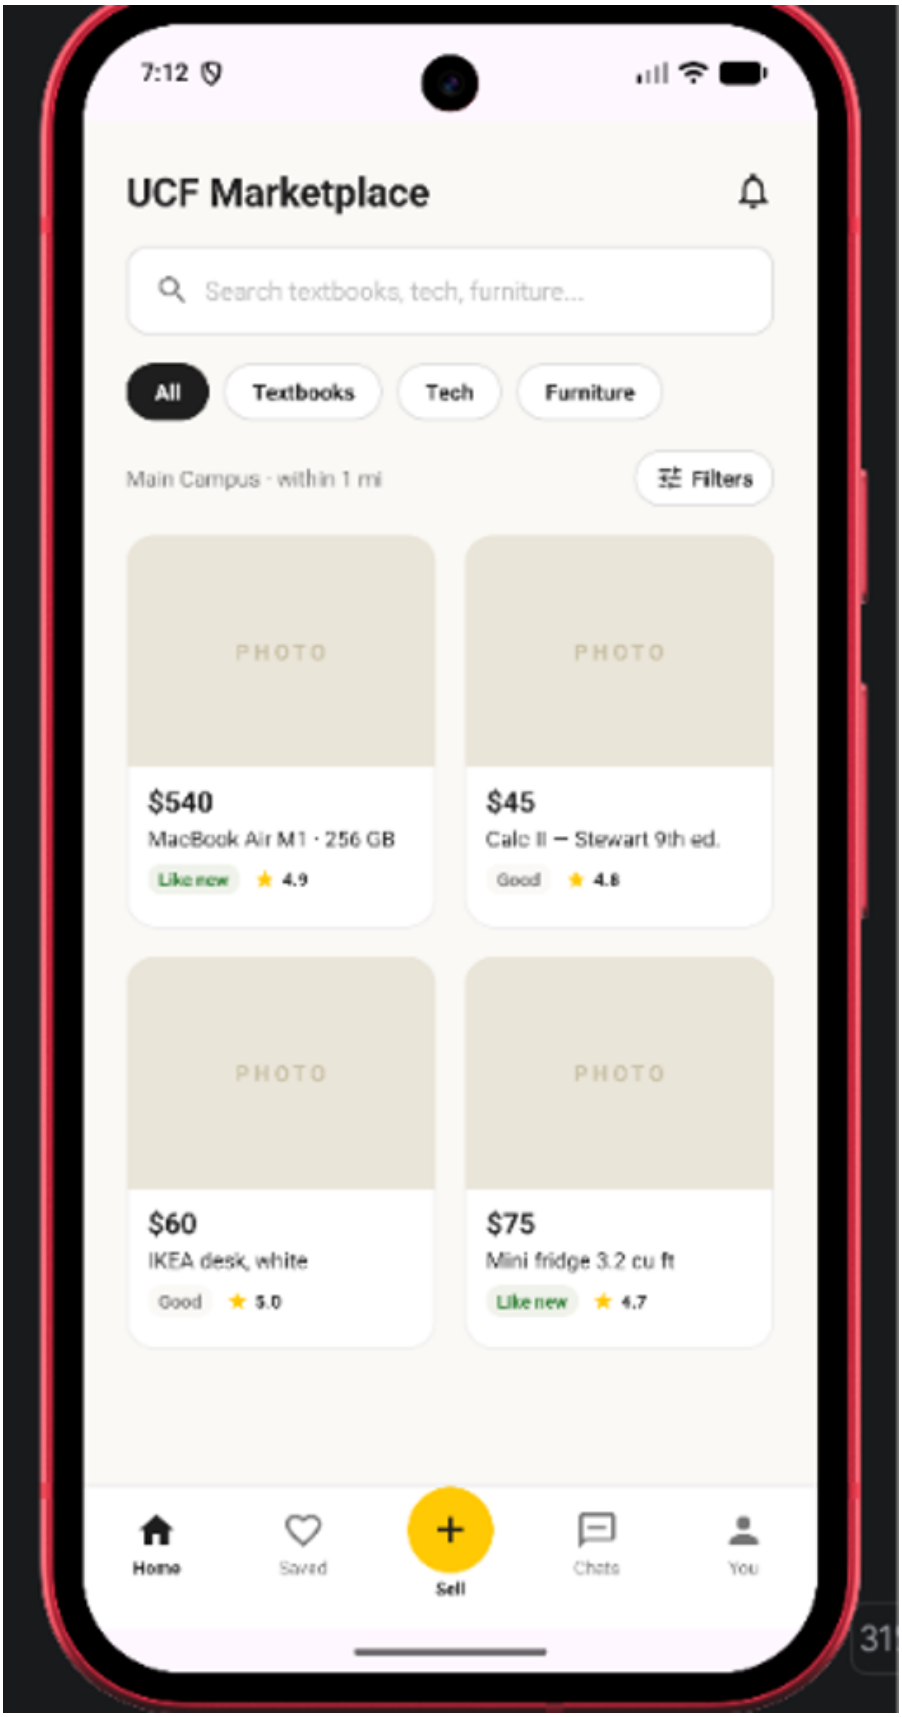

Screen 06: Community rules

activity_community_rules.xml

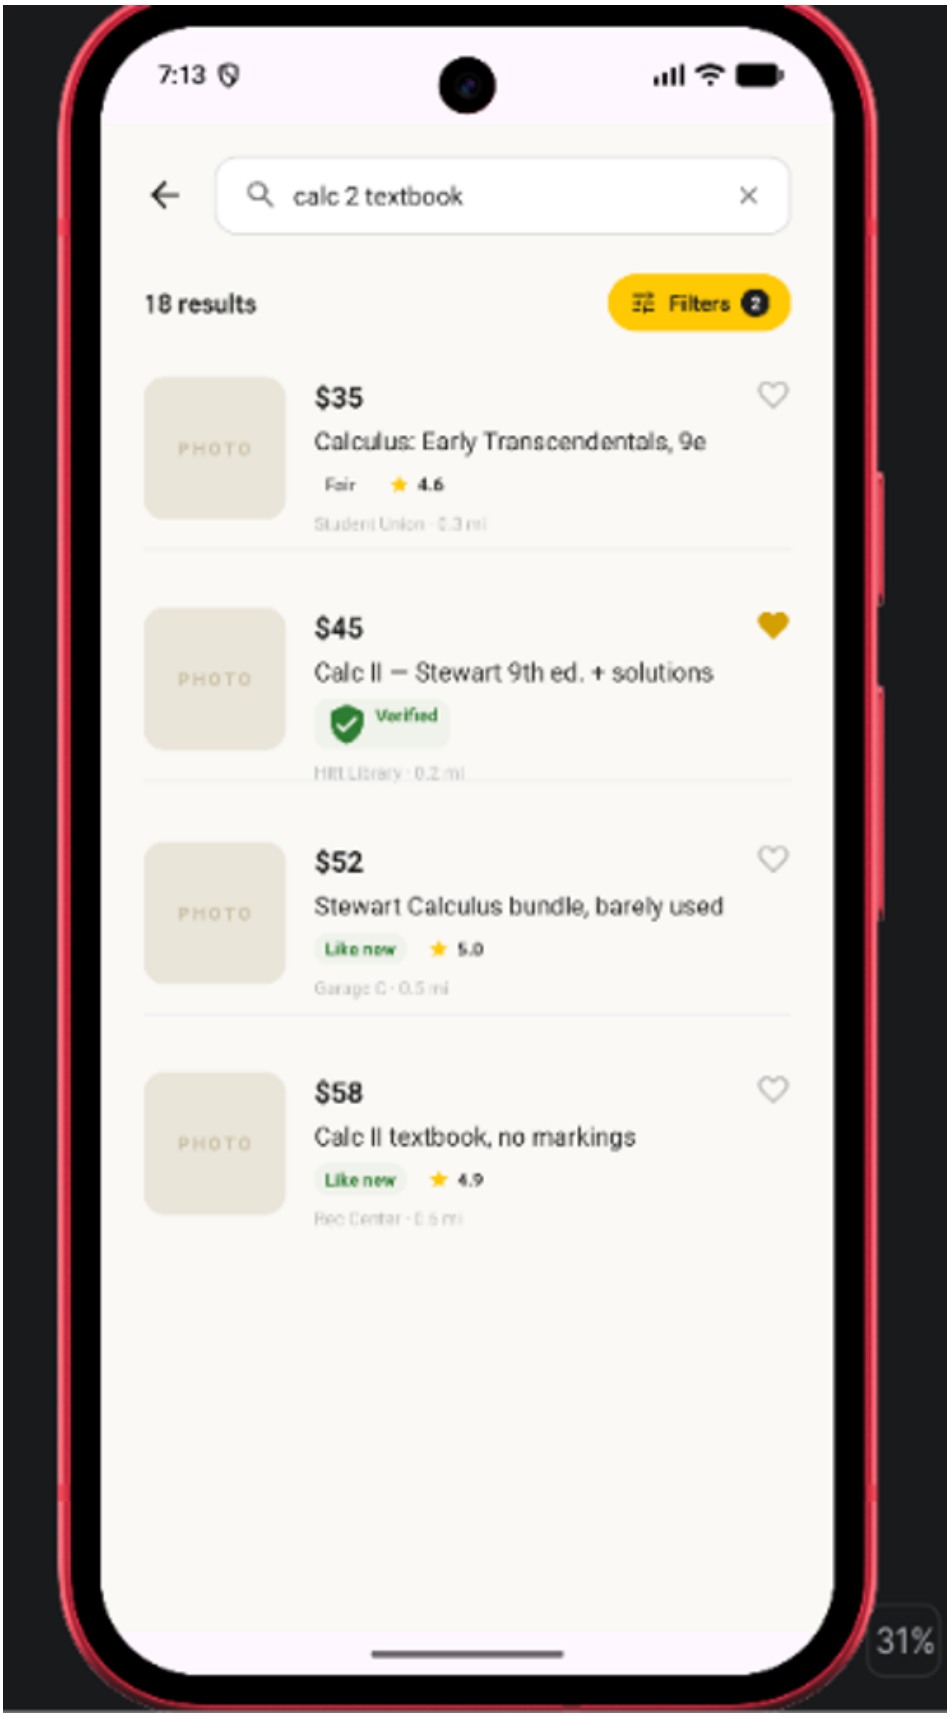

Screen 07: Home / Shopping

activity_shopping.xml

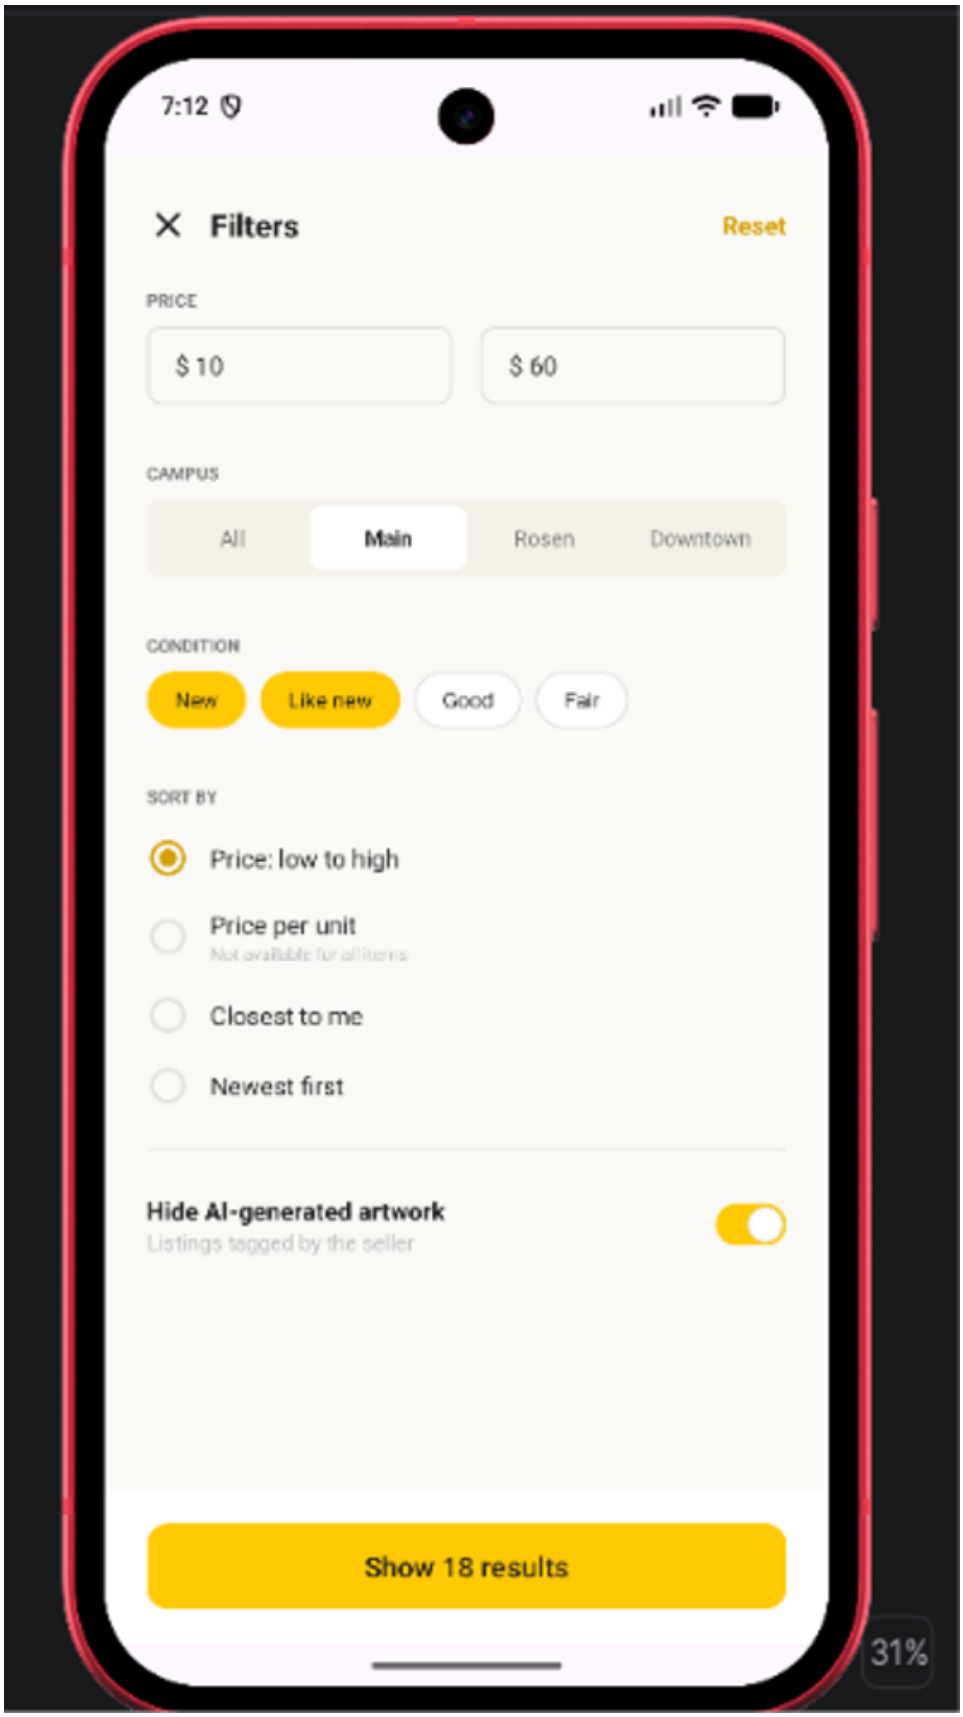

Screen 08: Search results

activity_search_results.xml

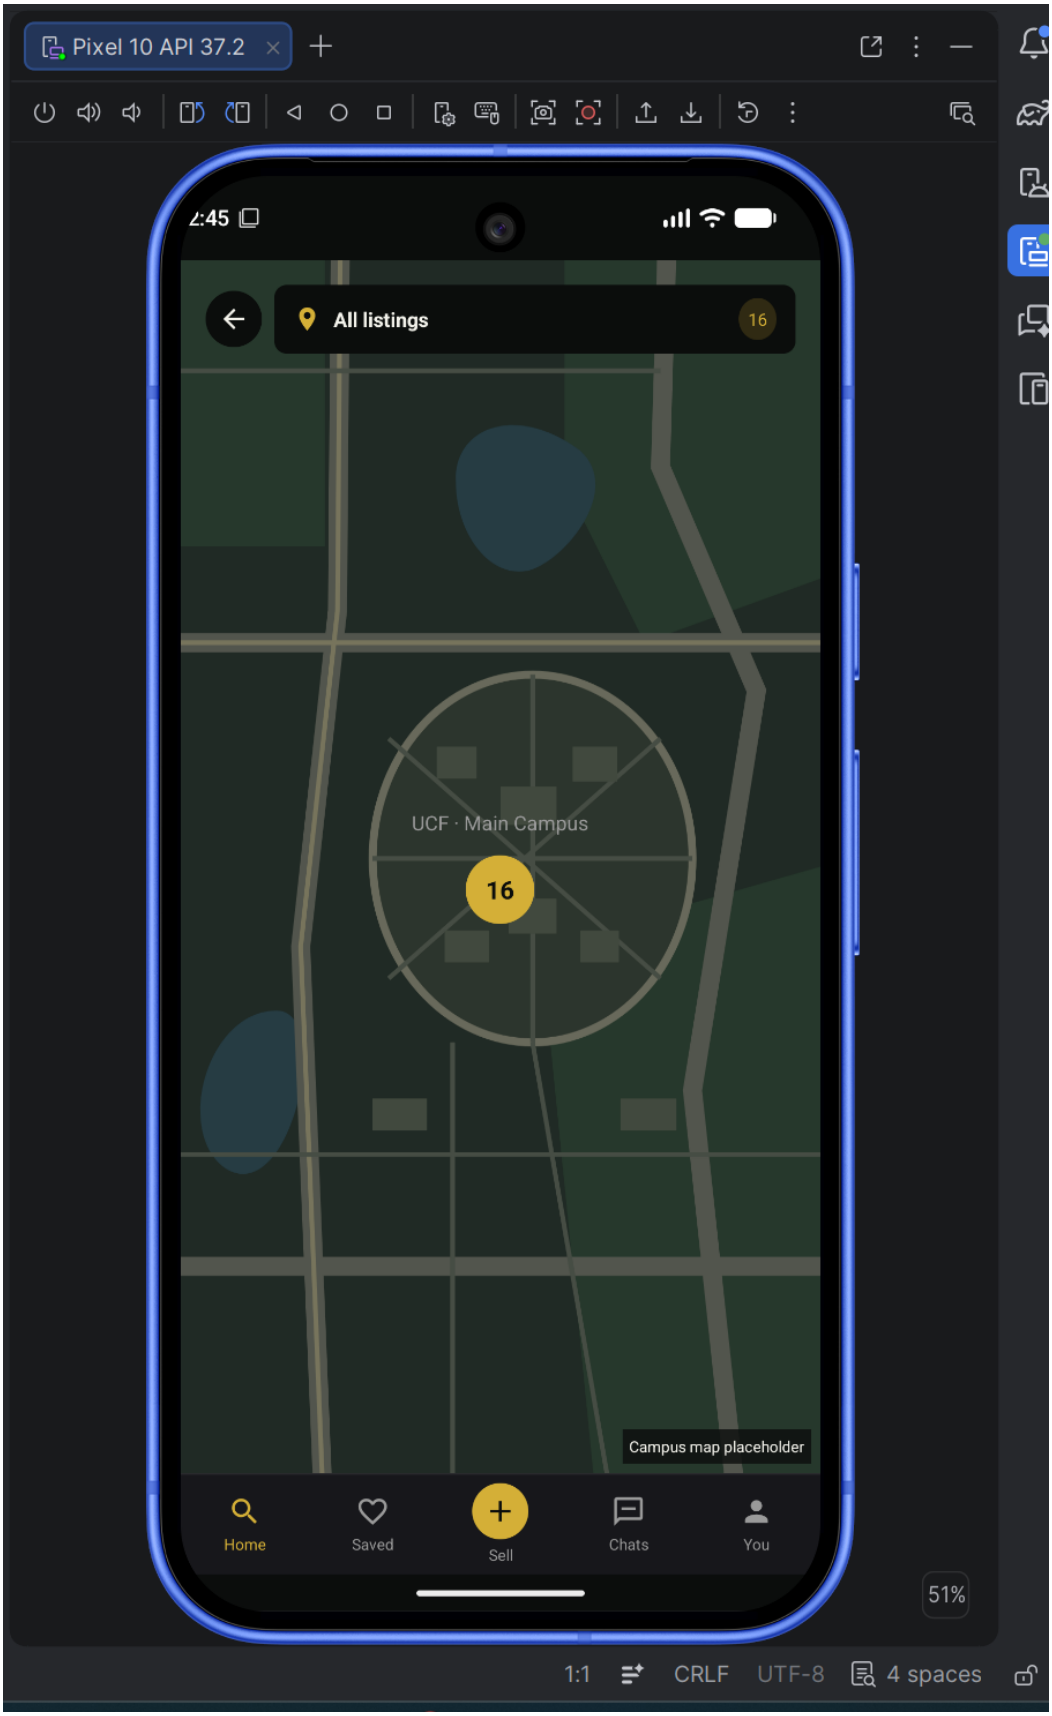

Screen 09: Filters

activity_filters.xml

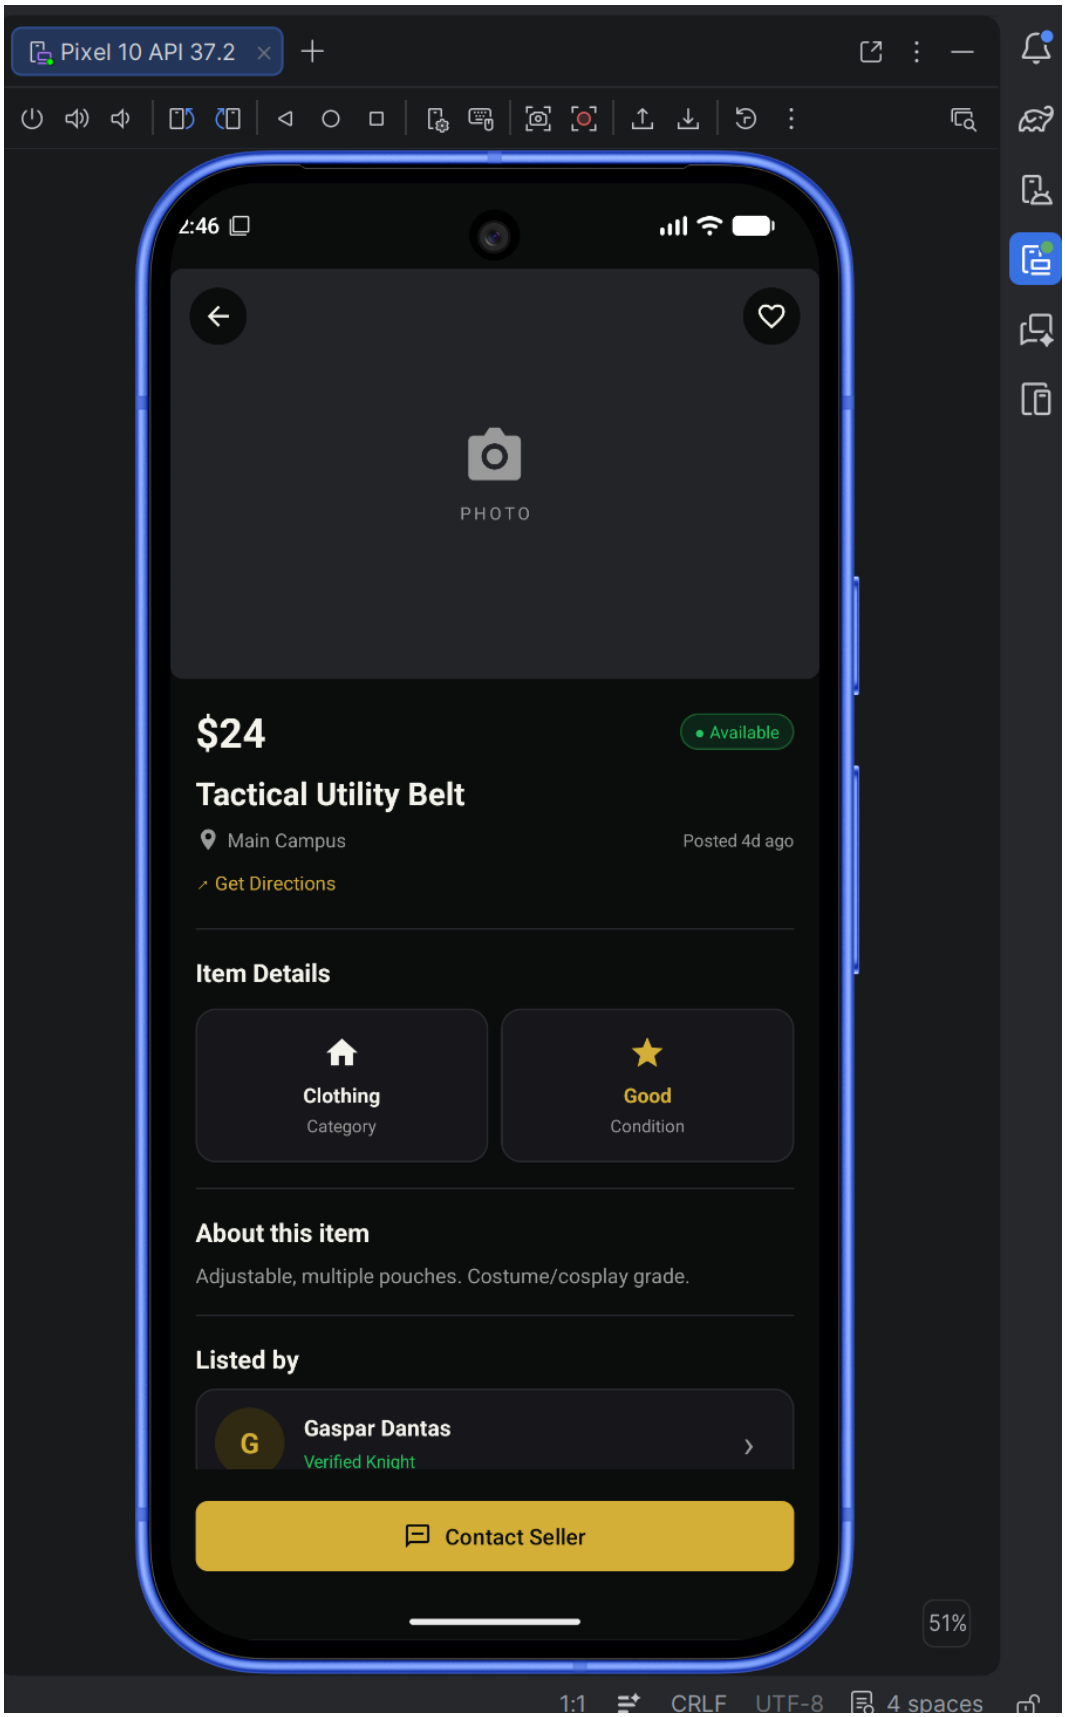

Screen 10: Map

activity_map.xml

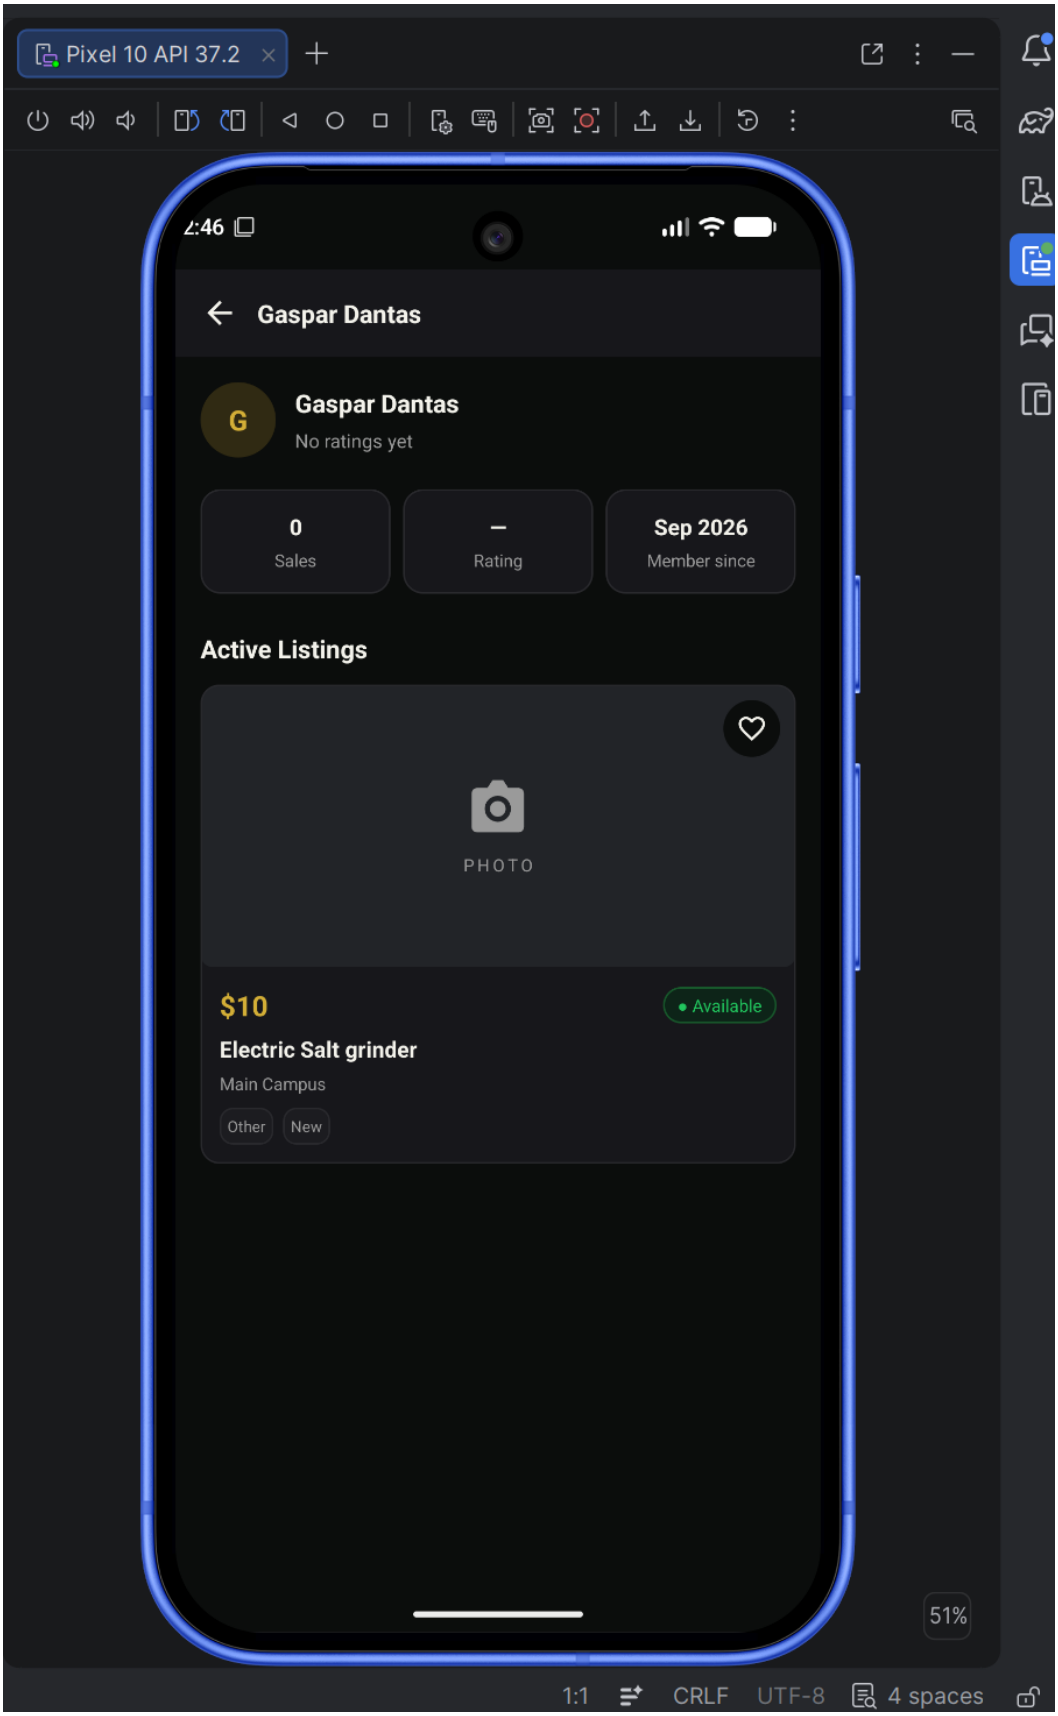

Screen 11: Listing detail

activity_listing_detail.xml

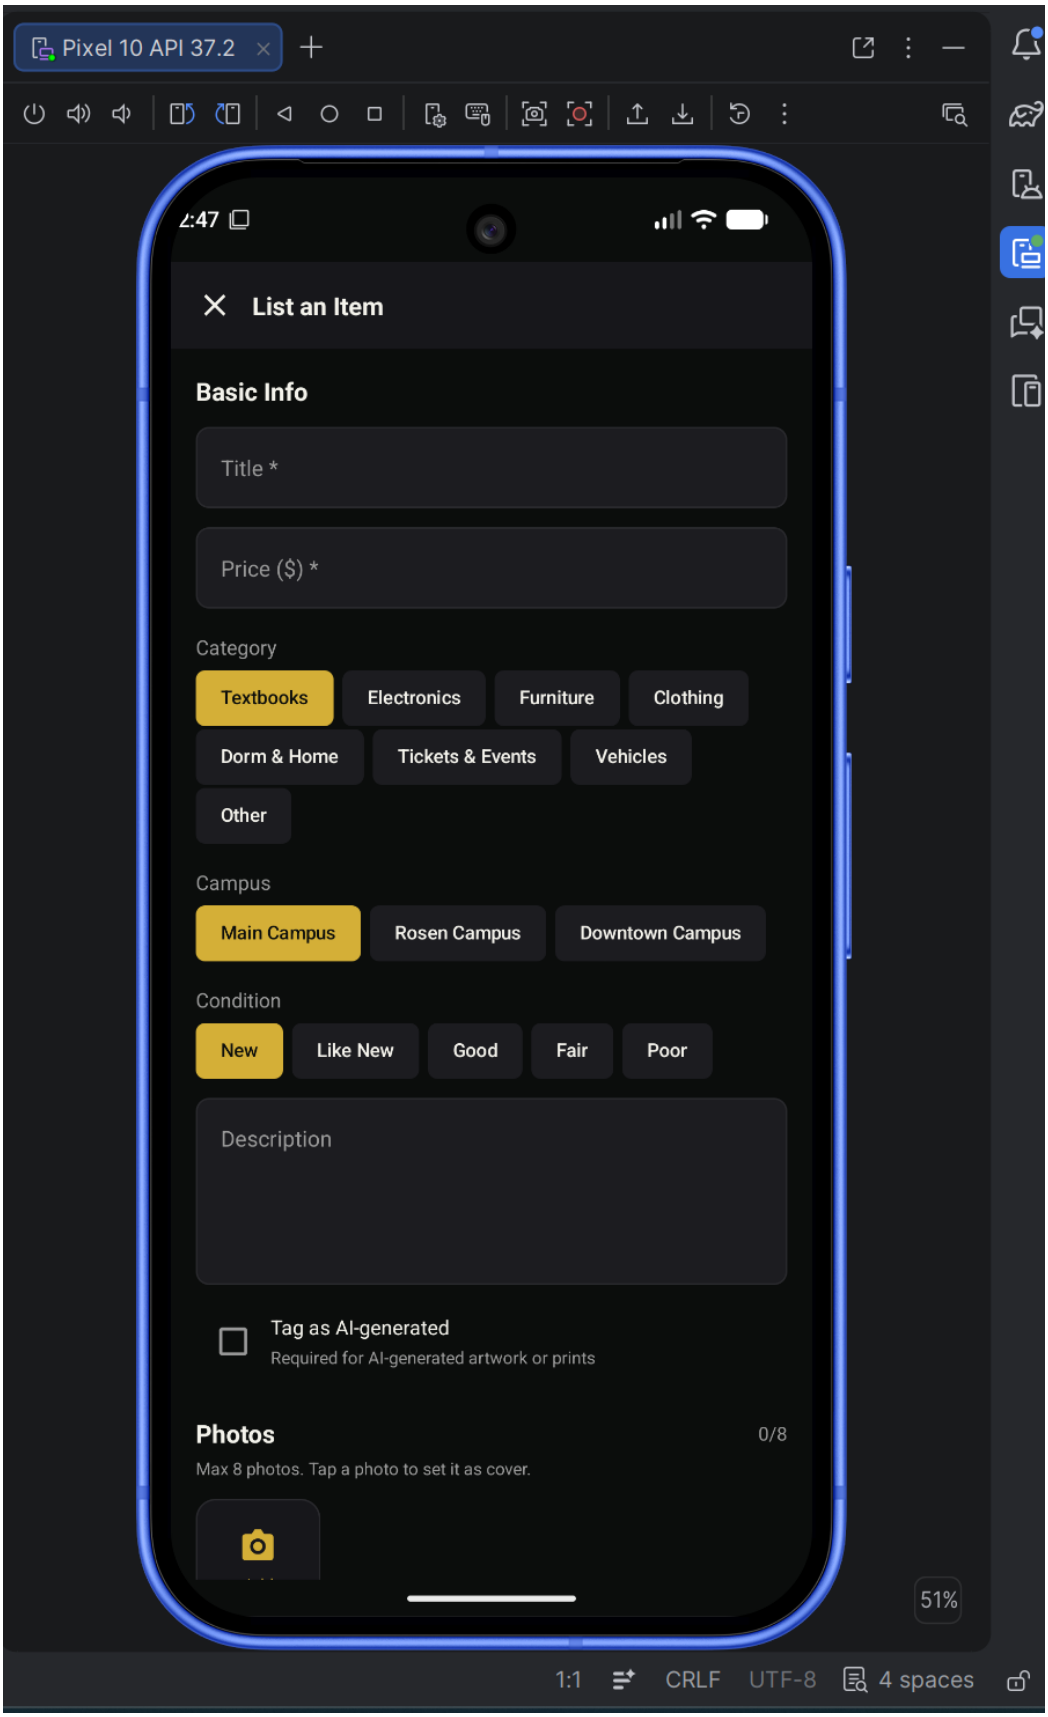

Screen 12: Seller profile

activity_seller_profile.xml
